Intern Name: Shubhra Jain

Intern ID: 2075259

Re: Certificate of completion of Internship

Dear Shubhra,

This is to certify that you have successfully completed the internship and project assigned to you during the period starting from Jun 06, 2022 till August 05, 2022 ("Internship Duration"). Pursuant to completion of Internship Duration, we hereby relieve you from duties assigned to you, except those of confidentiality obligations agreed during your Internship Duration, after close of working hours of LWD.

We request you to kindly note that our commitment to relieve you is subject to you completing the exit formalities per the company policy.

We wish you the very best in your career.

Please contact Indiafinalsettlement@wellsfargo.com if you have any questions on the exit process.

Sincerely,

For Wells Fargo International Solutions Private Ltd

Durgesh Nagarkatte

Internship Offer Letter

Ref: TCSL/AIP 2021-22/Winter/DT20218601179

Date: 12-Oct-2021

Darshana Pondkule
Cummins College of Engineering for Women, Pune
darshanapondkules@gmail.com

Dear **Darshana Pondkule**,

Sub: Internship Offer

We are pleased to offer you internship in Tata Consultancy Services (TCS) with the following terms and conditions:

1. The tentative start date is 18-Oct-2021 and end date is 30-Jun-2022. These dates can be changed in discussion with the Project Guide
2. You will be assigned a Project Guide under whose supervision you will work on the project assigned to you.
3. You shall complete your project in accordance with the requirements and guidance of the TCS Project Guide, and maintain qualitative standards as required. You will maintain the discipline, dignity, honor and goodwill of TCS.
4. The arrangement is not that of an employer and an employee and as such you shall not be eligible to any allowances or other benefits as may be available to the employees of TCS.
5. You will observe the rules & regulations and discipline of TCS, and also maintain complete confidentiality and secrecy of the matters pertaining to TCS and/or any data that has been provided to you in the course of your project work. The detailed terms of Confidentiality, Data and Intellectual Property Protection are enclosed as Annexure A. You will be permitted to attend any classes in the college / university at the discretion of the Project Guide if so called for during the period of your project assignment.
6. On completion of your internship, you will be required to submit a copy of your project report, which will be the sole property of TCS.
7. You shall not undertake any internship in parallel with this internship
8. In the event of any misconduct or breach of terms of this internship on the part of the Intern during the internship period, TCS reserves the right to terminate internship without any notice.
9. This offer of Internship will be governed as per the Laws of India.

Annexure A

Confidentiality, Data and Intellectual Property Protection

1. Confidential Information

“Confidential Information” shall mean any and all Inventions and Know-how, information and material of TCS (including for avoidance of doubt any Confidential Information of its Clients) that comes into the possession or know of the Intern and shall include the following:

- a) Any and all information processing programs, software, properties, items, information, data, material or any nature whatsoever or any parts thereof, additions thereto and materials related thereto, produced or created at any time by TCS or the Intern in the course of or in connection with or arising out of the Intern’s association with TCS. Program/Software shall mean source code and/or machine instructions wherever resident and on whatever media and all related documentation and software,
- b) All other information and material of TCS relating to design, method of construction, manufacture, operation, specifications, use and services of the TCS equipment and components, including, but not limited to, engineering and laboratory notebooks, reports, process data, test data, performance data, inventions, trade secrets, systems, software, object codes, source codes, copyrighted matters, methods, drawings, computations, calculations, computer programs, narrations, flow charts and all documentation therefore and all copies thereof (including for avoidance of doubt any such material belonging to the Clients of TCS).
- c) Corporate strategies and other confidential and proprietary material and information, which could cause competitive harm to TCS if disclosed,
- d) Customer and prospective customer lists, and
- e) All other information and material, which may be created, developed, conceived, gathered or collected or obtained by the Intern in the course of or arising out of the association with TCS or while in or in connection with or for the purposes of his/her association with TCS or any of the operations and entrusted by TCS to the Intern.

2. Intern’s Obligations

Intern agrees to treat the Confidential Information as strictly confidential and a trade secret of TCS. Intern agrees not to use, or cause to be used, or disclose or divulge or part with either directly or indirectly any Confidential Information for the benefit of or to any third parties except for or on behalf of or as directed or authorized by TCS or to a person

having a valid contract with TCS. Upon termination of employment, the Intern agrees to surrender to TCS all Confidential Information that he or she may then possess or have under his or her control.

3. Intellectual Property Rights

Intern agrees and confirms that all intellectual property rights in the Confidential Information shall at all times vest in and remain with or belong to TCS and Intern shall have no right title or claim of any nature whatsoever in the Confidential Information. Intern shall promptly disclose to an authorized officer of TCS all inventions, ideas, innovations, discoveries, improvements, suggestions, or reports and enhancements made, created, developed, conceived or devised by him or her arising out of his or her engagement with TCS, including in the course of provision of services to the Clients of TCS and Intern hereby agrees and confirms that all such intellectual property rights shall at all times vest in and remain vested in TCS and agrees to transfer and assign to TCS any interests Intern may have in such intellectual property rights including any interest in and to any domestic or foreign patent rights, trademarks, trade names copyrights and trade secret rights therein and any renewals thereof. On request of TCS, Intern shall execute from time to time, during or after the termination of his or her employment, such further instruments, including without limitations, applications for letters of patent, trademarks, trade names and copyrights or assignments thereof, as may be deemed necessary or desirable by TCS to perfect the title of TCS in the intellectual property rights and to effectuate the provisions hereof. All expenses of filing or prosecuting any application for patents, trademarks, trade names, or copyrights shall be borne solely by TCS, but Intern shall co-ordinate in filing and / or prosecuting any such applications. Intern hereby expressly waives any "artist's rights" or "moral rights", which Intern might otherwise have in such intellectual property rights.

4. Prior knowledge

Intern acknowledges that prior to his or her appointment by TCS, he or she had no knowledge of the Confidential Information of TCS and that such Confidential Information is of a confidential and secret character and is vital to the continued success of TCS's business. Intern further acknowledges that he or she is associated with TCS in a capacity in which he or she will become acquainted with all or part of such Confidential Information. In order to safeguard the legitimate interests of TCS in such Confidential Information, it is necessary for TCS to protect such Confidential Information by holding it secret and confidential.

5. Use of Third-Party material

Intern expressly agrees that he or she shall not in the course of his or her association with TCS and while working on the premises or facilities of TCS or its Clients or in connection with the development of any intellectual property rights or work for or on behalf of TCS;

- a) Use any Third-Party material or intellectual property rights except those intellectual property rights provided by TCS or expressly authorised by TCS or without having proper authorisation or license or approval of the respective owner of such intellectual property rights.
- b) Participate in any activity for creation (including conception, design, development, testing, implementation, support or marketing) of any Intellectual Property for or on behalf of TCS or its affiliates if he or she has been exposed, directly or indirectly, to any Third-Party IP which is in the same subject area (such as research area, technology or application area) as, or which is same or similar to, the Intellectual Property or any portion thereof, to be so created, unless;
 - i. Intern has expressly declared to TCS in a prescribed form whether such exposure was owing to publicly available information or under and subject to any agreement; AND
 - ii. TCS has expressly confirmed to the Intern that TCS has proper authorization or license or approval of the respective owner of such Third-Party IP to use the same in Intellectual Property or portion thereof to be created and authorized in writing Intern's participation in such activity.
- c) Knowingly access, make reference to or use any Third-Party IP (except as permitted under Section 5(a), directly or indirectly, during the period of association with the creation (conception, design, development, testing, implementation, support or marketing) of TCS Intellectual Property or portion thereof, which is in the same subject area of TCS Intellectual Property or which is same or similar to such TCS Intellectual Property or portion thereof being created. In case, Intern access or is exposed to any such Third-Party IP during such association, Intern shall promptly bring it to the notice of TCS IP asset owner or TCS project manager in writing and immediately cease to participate in any such activity.

6. Security policies and Guidelines

- 6.1 Intern agrees to abide by and be bound by any and all policies, documents, guidelines and processes including IP, Information Security and Confidentiality of TCS in force from time to time whether expressly endorsed or not.
- 6.2 Intern acknowledge and agree that in the course of, and as a result of his/her engagement with TCS, Intern will have access to, obtain or come across personal

data or information of other TCS Associates or Clients, including without limitation, sensitive personal data or information (collectively “Personal Data and Information”) within the meaning of the applicable Indian Law and Rules or any other applicable Law, directive or regulation anywhere in the world. In respect of any such Personal Data and Information accessed, obtained, acquired or processed by Intern for and on behalf of TCS, its affiliates or Clients, Intern undertake that he/she will:

- a) Process the Personal Data and Information only on behalf of TCS, its Affiliates or Clients, as the case may be, and only on and in accordance with instructions received from the data controller from time to time;
- b) Abide by such technical and organizational measures necessary to prevent the accidental or unlawful destruction or accidental loss, alteration, un-authorized disclosure or access to the Personal Data and Information;
- c) Promptly (and in any event within 24 hours of awareness) bring to notice of TCS or its Affiliates, as the case may be, of any actual or suspected incident of unauthorized or accidental disclosure of, or access to, the Personal Data and Information or other breach of this section (a “Security Breach”);
- d) Promptly provide TCS with all information in Intern’s notice, possession or control concerning any Security Breach and not make any public announcement regarding a Security Breach without TCS’ prior written consent;
- e) Not do, or omit to do, anything, which would cause TCS or any of its employees, officers or agents to be in breach of its obligations under any privacy or data protection policy, regulation or legislation;
- f) Upon expiry or termination of Intern’s engagement with TCS, return all copies of the Personal Data and Information to TCS in Intern’s possession or control; and
- g) Promptly bring to TCS’ notice of any request received from a data subject to have access to his/her Personal Data and Information or of any other communication relating to the access, use or processing of any Personal Data and Information (including any notice from the regulatory body) and fully cooperate and assist TCS in relation to any such request or communication.

6.3 Intern expressly consent that TCS and/or its affiliates may collect, use, transfer, retain or otherwise process Intern’s Personal Data and Information in connection with his/her engagement with TCS, in accordance with the then / current TCS policies and procedures and applicable privacy and data protection legislation. TCS may use Third-Party services or sub-contractors to collect or otherwise process Intern’s Personal Data and Information for which TCS shall remain responsible for

such Third-Party services provider or sub-contractor's compliance with TCS' obligations hereunder.

7. Working in SBWS™ Framework

Intern may be required to work in TCS or its Client's premises or from home (remote working) as per the directions of supervisor and / or the provisions of the applicable policy. Intern understands that working in this hybrid environment may have higher confidentiality and information security risks. Intern acknowledges that when working remotely the Intern:

- a) will work only in a private, secured work area in compliance with the guidelines issued and amended from time to time.
- b) will comply with and work in a manner consistent with TCS Data Privacy and Security Policies/Protocols.
- c) will bring to the notice of HR of the Unit to any circumstances that prevent Intern from working in a manner consistent with TCS data privacy and security policies/protocols.
- d) will inform the HR of the Unit if the Intern shares a home with any family member or an individual who is employed by a competitor of TCS or TCS client the Associate is assigned to, or if any other circumstances at home exist which implicates the TCS Code of Conduct Conflict of Interest provision;
- e) will ensure utmost care and adhere to Confidentiality, IP Protection / Non-Disclosure obligations.
- f) will be using the Company allotted laptop or similar authorized computing device (together called "official asset") only to connect to TCS network/customer network through authorized means (or the Customer provided laptop to access the customer network if so, mandated by the Customer).
- g) will not allow anybody to share the official asset being used
- h) where allowed to use personal workstation/laptop or similar computing device (together called "personal asset") to connect to TCS network/customer network, Intern will ensure that he/she fully complies with obligations under this Confidentiality, IP Protection / Non-Disclosure Agreement and adheres to the security best practices that is generally followed and ensure that Intern's access to TCS / TCS Client systems is in line with the approved model. The Intern further agrees that by seeking permission to use a personal asset, the Intern implicitly authorizes the Company to have unhindered access to run scans / forensics, should there be justified reasons to do so.

8. Restriction on Intern's Rights

Intern agrees that he or she shall not make, have made, replicate, reproduce, use, sell, incorporate or otherwise exploit, for his or her own use or for any other purpose, any of the Confidential Information including intellectual properties of TCS that is or may be revealed to him or her by TCS or which may in the course of his or her employment with TCS come into his or her possession or knowledge unless specifically authorized to do so in writing by TCS.

9. No License

TCS and Intern agree that no license under any patent or copyright now existing or hereafter obtained by TCS is granted, agreed to be granted, or implied by the terms of this Agreement, or by the disclosure to Intern of the Confidential Information.

10. Equitable Rights

Intern acknowledges that any Confidential Information that comes into the possession and / or knowledge of Intern is of a unique, highly confidential and proprietary nature. It is further acknowledged by Intern that the disclosure, distribution, dissemination and / or release by Intern of the Confidential Information without the prior written consent of TCS or any breach of the Confidentiality Clause by Intern will cause TCS to suffer severe, immediate and irreparable damage and that upon any such breach or any threat thereof, TCS shall without prejudice to any other remedies available to it, be entitled to appropriate equitable relief including the relief of specific performance and injunctive relief, in addition to whatever remedies it might have at law.

11. General

- a) The provisions hereof shall be interpreted, determined and enforced in accordance with the laws of India.
- b) In the event of any dispute or disagreement over the interpretation of any of the terms herein contained or may claim or liability of any party, the same shall be referred to a person to be nominated by TCS, whose decision shall be final and binding upon the parties hereto. Subject to the above, the arbitration shall be governed by the Arbitration and Conciliation Act, 1996 or any modifications or re-enactment thereof. Intern confirms that the fact that the arbitrator shall be a nominee of TCS shall not be a ground for objecting to such arbitration or challenging the decision of the arbitrator. The venue of arbitration shall be Mumbai. Subject to the

above arbitration clause, the Parties agreed to the binding jurisdiction of the Courts at Mumbai under the laws of India.

- c) If any provision hereof shall be found by a judicial tribunal to be contrary to governing law, it shall be deemed null and void without annulling or rendering invalid the remainder of the Agreement and if the invalid portion is such that the remainder cannot be sustained without it, the Parties herein shall find a suitable replacement to the invalid portion that shall be legally valid.
- d) This Confidentiality clause along with other documents executed by Intern or referenced in any such documents constitutes the entire understanding between the parties and supersedes all prior agreements and understandings pertaining to the subject matter thereof. No delay of omission of either Party in exercising or enforcing any of their rights or remedies hereunder shall constitute a waiver thereof.
- e) This Confidentiality clause may not be amended except in writing signed by authorized representatives of both parties.
- f) The obligations of Intern in terms of this Confidentiality clause shall continue during the term of or in the course of the internship of the Intern with TCS and shall continue thereafter in perpetuity.

TERMS AND CONDITIONS OF APPOINTMENT

1. Your services would be governed by the Company's rules and regulations in force currently and as applicable from time to time. The facilities, amenities and benefits provided to interns in excess of the statutory requirements do not form a part of the conditions of service and are subject to change or be reduced at the discretion of the Management.
2. You are liable to be transferred to any of the Company's establishments which may be set up in any part of the country. On your transfer, you will be governed by the Company's rules and regulations applicable to that establishment.
3. You will be entitled to leave (vacation) in accordance with the Company guideline.
4. During the period of your employment with the Company you shall not engage in any other profession or business, publish any articles or deliver any talk pertaining to your profession or be associated with any organization pertaining to your profession, without the written consent of the Company.
5. You shall, at all times, maintain complete secrecy about the Company's business affairs, inventions, techniques and processes of manufacturing and management and the like which may come to your knowledge during your internship.
6. You shall inform the Company immediately regarding any inventions, patents, processes etc. that you may make or discover in the course of your employment and the Company shall have the right to take over the patent, process or invention on payment of such compensation as may be considered appropriate by the Company.

You shall promptly disclose in confidence to the Company all inventions that you make or conceive or first reduce to practice or create, either alone or jointly with others, during the term of your employment. You hereby undertake that all such inventions shall vest exclusively and perpetually with the Company and you shall have no claims or rights to such inventions.

7. You agree to execute a separate 'assignment deed' from time to time, as and when required by the Company, for the purpose of assignment of all the inventions in favour of the Company. You shall at all times co-operate with the Company and its agents and/or attorneys as may be necessary to perfect, maintain, defend and enforce the

Dependable People.
Working Right.

patenting of the Inventions including the future developments / improvements / modifications thereof, and to perform all actions and execute all such deeds and documents as shall be necessary to formalize the vesting of the legal and beneficial title/ownership of the Company thereto.

TERMS AND CONDITIONS OF APPOINTMENT

You for the purpose of giving to the Company, the full benefit of the provisions of this Clause, hereby agree to issue an irrevocable and indefinite power of attorney to the following effect:

“Where Cummins Technologies India Private Limited is unable, after contacting **RUTUJA SHINDE** either in person or by registered post addressed to the last known address of such **RUTUJA SHINDE** as in Cummins Technologies India Private Limited’s records, to secure **RUTUJA SHINDE**’s signature for any reason whatsoever, **RUTUJA SHINDE** irrevocably designates and appoints Cummins Technologies India Private Limited and its duly authorized officers and agents, as **RUTUJA SHINDE**’s agent and attorney-in-fact, to act for and on behalf of **RUTUJA SHINDE**, to execute and file any application(s) or document and to do all other lawfully permitted acts to further the prosecution, issuance, and enforcement of letters patent, copyright or other analogous rights or protections, with the same legal force and effect as if executed by **RUTUJA SHINDE**.”

8. You recognize the right of the Company to commercially exploit and market the Inventions and any future development / modification / improvement thereof in all formats/applications all over the world and waives any future claim or interest in the ownership or proceeds from commercialization of such Intellectual Property developments, modifications, or improvements.
9. Injunctive Relief - You agree that in the event of breach or threatened breach of any of the above clauses, the Company shall suffer irreparable injury and the Company shall be entitled to specific performance of your obligations as well as such further injunctive relief as may be granted by any court of competent jurisdiction, without prejudice to any other relief, monetary or otherwise as the Company may be entitled under the applicable laws.
10. You shall maintain and render an account of all such Company properties and equipment entrusted to you and shall be liable for the same.
11. You will not resort to / indulge in use of tobacco in any form, i.e. smoking, chewing and snuffing on the premises of the company.
12. You or the Company can terminate the service contract without assigning any reason, by a written notice of one month or payment of salary and allowances (Guaranteed Cash Components) in lieu thereof.
13. You are required to keep the Company informed of any change pertaining to any of the declarations made by you at the time of your internship.
14. Your personal data may be stored on secured servers and or computer networks in or out of India protected as per Cummins IT policies in force regarding access and data

Dependable People. *Working Right.*

security. You hereby agree to permit access to your personal data to authorized Cummins Officials in India and abroad for official purposes from time to time.

15. Confidentiality Obligations - You shall treat all Confidential Information acquired during the course of your employment and the Intellectual Property of the Company, as strictly confidential, and shall not disclose it to any third party, or make use of it, without the prior written and express consent of the Company. This obligation of yours shall persist during the term of your internship and also after expiry or termination or cessation of your internship with the Company for any reason whatsoever.

16. Definitions: For the purposes of these terms and conditions, the following meaning shall hold:

“Confidential Information” shall mean any trade secrets or confidential or secret information, whether marked or unmarked, in any media relating to the business, technical processes, designs or finances of the Company and its suppliers, agents, distributors, clients or customers or any confidential or secret information connected with the services provided or products manufactured, marketed or under development by the Company and in particular shall include (but not be limited to) Inventions, research papers, computer models generated by the Intern or provided to the Employee during the internship, business plans, marketing plans, budgets and costing, any information regarding Intellectual Property, or any information received from a third Party that is protected by a duty of confidence.

“Intellectual Property” shall mean patents and all relevant pending applications; trademarks, trade names, logos or other information which may identify business operators; copyrights; know-how; trade secrets; designs; computer, data and documentation; domain names; and other intellectual properties.

“Invention” shall mean all inventions, improvements, designs, original works of authorship, research data, formulas, processes, compositions of matter, computer software programs, databases, mask works, and trade secrets and shall also include any discoveries that the Intern makes or conceives or first reduces to practice or creates, either alone or jointly with others, during the period of his internship with the intern/Company, whether or not made during or after normal business hours and whether or not patentable, copyrightable or protectable as trade secrets.

17. You shall not give any press release or other external communication regarding any part of this agreement, including any general statements as to the existence of a relationship, except with the prior written consent of the Company.

18. Any dispute or difference arising out of or related to your employment / internship shall have jurisdiction of Court of Pune (Maharashtra) only.

CUMMINS CODE OF BUSINESS CONDUCT

OUR VISION

Innovating for our customers to power their success

OUR MISSION

Making people's lives better by powering a more prosperous world

Cummins is a value based organization. Our core values are -

1. INTEGRITY

Doing what you say you will do and doing what is right

2. DIVERSITY & INCLUSION

Valuing and including our differences in decision making is our competitive advantage

3. CARING

Demonstrating awareness and consideration for the wellbeing of others

4. EXCELLENCE

Always delivering superior results

5. TEAMWORK

Collaborating across teams, functions, businesses and borders to deliver the best work

- Our commitment to integrity means that we will exceed the minimum requirements of the law and industry practices. We feel strongly about our written policies and will not tolerate violations at any level of the Company.

CONDUCT REGARDING OUR CUSTOMERS, SUPPLIERS AND COMPETITORS

Treatment of Customers

We are dedicated to exceeding the expectations of our customers better than our competitors. Our products, information and support are designed to give our customers a competitive advantage

Competitors

Cummins competes vigorously with our competitors, but always with integrity. Employees should not disparage Cummins competitors or their products. Generally, an employee should not accept confidential information about a competitor.

Dependable People.
Working Right.

Government Contracts

As since the Company is a supplier to federal, state and local governments around the world, Cummins employees must comply with all laws and regulations relating to government contracts and cooperate fully with investors and auditors who require information in connection with these contracts.

Payments to Government Officials

Cummins policy must be closely followed while making payments to individuals outside the normal course of business. In no event should a payment be made that violates the Foreign Corrupt Practices Act of 1977, which is detailed in the full policy.

Dealing with Suppliers

If an employee or his/her family member has a relationship with a current or potential supplier, there exists the potential for a conflict of interest. So, the employee should not participate in any decisions related to the supplier or potential supplier, and should inform his/her supervisor of the relationship.

Meals, Gifts and Discounts

Generally, Cummins employees should refrain from accepting gifts. However, if a refusal to accept a present offends the other party, then a gift of nominal value may be accepted. If it is a high value, then it should be reported. Cummins employees should not accept discounts on personal goods that are linked to actual or potential business dealings.

Definition and treatment of expenses listed below are available in the detailed Code of Conduct policy which you need to study and follow:

- **Dining: With Business Colleagues, including Hosting Conferences**
- **Business Entertainment**
- **Employee Recognition**
- **Outside Employment**
- Employees should not work for a Cummins customer, supplier, or competitor. Employees may not hold other full or part-time positions or directorships outside the Company unless the job is permitted by the employee's manager and is disclosed in the annual Ethics Certification Statement.

- **Trading in Cummins Securities**
- Illegal trading in Cummins stocks and securities is not permitted. To avoid problems with stock purchases or sales, employees should refer to the details mentioned in the Cummins Code of Conduct.

- **CONDUCT REGARDING OUR EMPLOYEES**
- **Treatment of Each Other at Work**
- To maintain an atmosphere of respect, no one should make comments that are embarrassing or demeaning to another. An employee who takes part in harassing behavior that creates a hostile or offensive work environment will be subject to severe disciplinary action. Our no-tolerance policy also applies to customers, suppliers and contractors.
- **Health, Safety and the Environment**
- Prevention of occupationally related injuries and illnesses is the responsibility of every Cummins employee. In addition, all employees are expected to immediately report unsafe or hazardous working conditions to a supervisor.
- **Alcohol and Illegal Drugs in the Workplace**
- Illegal drug or alcohol use on the job is not permitted. Disciplinary procedures for violation of this policy could include termination, even for a first offense.
- **Community Activities**

Dependable People. *Working Right.*

- The Company does not dictate the position employees should take on community or public issues. However, when an official Company position is necessary or desirable, only the appropriate Cummins officer can issue a statement.
- **CONDUCT REGARDING OUR SHAREHOLDERS**
- **Financial Records**
- No false or misleading entries or failure to make required entries is permitted for any reason. Each employee must report all corporate transactions accurately, including receipts, disbursements and the purpose of the transactions.
- **CONDUCT REGARDING OUR PROPERTY**
- **Information Security**
- should not attempt to access secret/ restricted data unless permitted by the owner of that information.
- **Computer Equipment and E-Mail**
- The Company’s computer hardware, software and data may be used only by authorized personnel for Company business. All licensing provisions and copyright restrictions are respected. Some personal use is allowed if it does not interfere with the employee productivity or pre-empt any business activity.
- **CONDUCT REGARDING POLITICAL CAMPAIGNS AND THE MEDIA**
- **Individual Responsibility**
- No Company property can be used to support any candidate’s political campaign, unless directed by the Cummins Political Action Committee. Employees may not conduct campaign activities during regular working hours.
- **Reporting Concerns**
- If an employee wishes to report any code compliance matters, s/he may Contact local Human Resource department or Legal department for any assistance or ethics.cummins.com or such reports may be made anonymously by calling the confidential Ethics Help Line at the appropriate number for the employee’s location. No employee will suffer any reprisal, retaliation or career disadvantage for reporting questionable behavior.
- This is an extract of the *Code of Conduct* and it is your responsibility to understand the detailed code immediately after joining Cummins. ***It is a pre-condition of your employment with the company that you adhere to the Cummins Code of Conduct and Treatment of Each other Policy.***

Internship Offer Letter

Ref: TCSL/AIP 2021-22/Winter/DT20218601147

Date: 12-Oct-2021

Kajal Bobade
Cummins College of Engineering for Women, Pune
kajaldhavale1@gmail.com

Dear **Kajal Bobade**,

Sub: Internship Offer

We are pleased to offer you internship in Tata Consultancy Services (TCS) with the following terms and conditions:

1. The tentative start date is 18-Oct-2021 and end date is 30-Jun-2022. These dates can be changed in discussion with the Project Guide
2. You will be assigned a Project Guide under whose supervision you will work on the project assigned to you.
3. You shall complete your project in accordance with the requirements and guidance of the TCS Project Guide, and maintain qualitative standards as required. You will maintain the discipline, dignity, honor and goodwill of TCS.
4. The arrangement is not that of an employer and an employee and as such you shall not be eligible to any allowances or other benefits as may be available to the employees of TCS.
5. You will observe the rules & regulations and discipline of TCS, and also maintain complete confidentiality and secrecy of the matters pertaining to TCS and/or any data that has been provided to you in the course of your project work. The detailed terms of Confidentiality, Data and Intellectual Property Protection are enclosed as Annexure A. You will be permitted to attend any classes in the college / university at the discretion of the Project Guide if so called for during the period of your project assignment.
6. On completion of your internship, you will be required to submit a copy of your project report, which will be the sole property of TCS.
7. You shall not undertake any internship in parallel with this internship
8. In the event of any misconduct or breach of terms of this internship on the part of the Intern during the internship period, TCS reserves the right to terminate internship without any notice.
9. This offer of Internship will be governed as per the Laws of India.

Annexure A

Confidentiality, Data and Intellectual Property Protection

1. Confidential Information

“Confidential Information” shall mean any and all Inventions and Know-how, information and material of TCS (including for avoidance of doubt any Confidential Information of its Clients) that comes into the possession or know of the Intern and shall include the following:

- a) Any and all information processing programs, software, properties, items, information, data, material or any nature whatsoever or any parts thereof, additions thereto and materials related thereto, produced or created at any time by TCS or the Intern in the course of or in connection with or arising out of the Intern’s association with TCS. Program/Software shall mean source code and/or machine instructions wherever resident and on whatever media and all related documentation and software,
- b) All other information and material of TCS relating to design, method of construction, manufacture, operation, specifications, use and services of the TCS equipment and components, including, but not limited to, engineering and laboratory notebooks, reports, process data, test data, performance data, inventions, trade secrets, systems, software, object codes, source codes, copyrighted matters, methods, drawings, computations, calculations, computer programs, narrations, flow charts and all documentation therefore and all copies thereof (including for avoidance of doubt any such material belonging to the Clients of TCS).
- c) Corporate strategies and other confidential and proprietary material and information, which could cause competitive harm to TCS if disclosed,
- d) Customer and prospective customer lists, and
- e) All other information and material, which may be created, developed, conceived, gathered or collected or obtained by the Intern in the course of or arising out of the association with TCS or while in or in connection with or for the purposes of his/her association with TCS or any of the operations and entrusted by TCS to the Intern.

2. Intern’s Obligations

Intern agrees to treat the Confidential Information as strictly confidential and a trade secret of TCS. Intern agrees not to use, or cause to be used, or disclose or divulge or part with either directly or indirectly any Confidential Information for the benefit of or to any third parties except for or on behalf of or as directed or authorized by TCS or to a person

having a valid contract with TCS. Upon termination of employment, the Intern agrees to surrender to TCS all Confidential Information that he or she may then possess or have under his or her control.

3. Intellectual Property Rights

Intern agrees and confirms that all intellectual property rights in the Confidential Information shall at all times vest in and remain with or belong to TCS and Intern shall have no right title or claim of any nature whatsoever in the Confidential Information. Intern shall promptly disclose to an authorized officer of TCS all inventions, ideas, innovations, discoveries, improvements, suggestions, or reports and enhancements made, created, developed, conceived or devised by him or her arising out of his or her engagement with TCS, including in the course of provision of services to the Clients of TCS and Intern hereby agrees and confirms that all such intellectual property rights shall at all times vest in and remain vested in TCS and agrees to transfer and assign to TCS any interests Intern may have in such intellectual property rights including any interest in and to any domestic or foreign patent rights, trademarks, trade names copyrights and trade secret rights therein and any renewals thereof. On request of TCS, Intern shall execute from time to time, during or after the termination of his or her employment, such further instruments, including without limitations, applications for letters of patent, trademarks, trade names and copyrights or assignments thereof, as may be deemed necessary or desirable by TCS to perfect the title of TCS in the intellectual property rights and to effectuate the provisions hereof. All expenses of filing or prosecuting any application for patents, trademarks, trade names, or copyrights shall be borne solely by TCS, but Intern shall co-ordinate in filing and / or prosecuting any such applications. Intern hereby expressly waives any "artist's rights" or "moral rights", which Intern might otherwise have in such intellectual property rights.

4. Prior knowledge

Intern acknowledges that prior to his or her appointment by TCS, he or she had no knowledge of the Confidential Information of TCS and that such Confidential Information is of a confidential and secret character and is vital to the continued success of TCS's business. Intern further acknowledges that he or she is associated with TCS in a capacity in which he or she will become acquainted with all or part of such Confidential Information. In order to safeguard the legitimate interests of TCS in such Confidential Information, it is necessary for TCS to protect such Confidential Information by holding it secret and confidential.

5. Use of Third-Party material

Intern expressly agrees that he or she shall not in the course of his or her association with TCS and while working on the premises or facilities of TCS or its Clients or in connection with the development of any intellectual property rights or work for or on behalf of TCS;

- a) Use any Third-Party material or intellectual property rights except those intellectual property rights provided by TCS or expressly authorised by TCS or without having proper authorisation or license or approval of the respective owner of such intellectual property rights.
- b) Participate in any activity for creation (including conception, design, development, testing, implementation, support or marketing) of any Intellectual Property for or on behalf of TCS or its affiliates if he or she has been exposed, directly or indirectly, to any Third-Party IP which is in the same subject area (such as research area, technology or application area) as, or which is same or similar to, the Intellectual Property or any portion thereof, to be so created, unless;
 - i. Intern has expressly declared to TCS in a prescribed form whether such exposure was owing to publicly available information or under and subject to any agreement; AND
 - ii. TCS has expressly confirmed to the Intern that TCS has proper authorization or license or approval of the respective owner of such Third-Party IP to use the same in Intellectual Property or portion thereof to be created and authorized in writing Intern's participation in such activity.
- c) Knowingly access, make reference to or use any Third-Party IP (except as permitted under Section 5(a), directly or indirectly, during the period of association with the creation (conception, design, development, testing, implementation, support or marketing) of TCS Intellectual Property or portion thereof, which is in the same subject area of TCS Intellectual Property or which is same or similar to such TCS Intellectual Property or portion thereof being created. In case, Intern access or is exposed to any such Third-Party IP during such association, Intern shall promptly bring it to the notice of TCS IP asset owner or TCS project manager in writing and immediately cease to participate in any such activity.

6. Security policies and Guidelines

- 6.1 Intern agrees to abide by and be bound by any and all policies, documents, guidelines and processes including IP, Information Security and Confidentiality of TCS in force from time to time whether expressly endorsed or not.
- 6.2 Intern acknowledge and agree that in the course of, and as a result of his/her engagement with TCS, Intern will have access to, obtain or come across personal

data or information of other TCS Associates or Clients, including without limitation, sensitive personal data or information (collectively “Personal Data and Information”) within the meaning of the applicable Indian Law and Rules or any other applicable Law, directive or regulation anywhere in the world. In respect of any such Personal Data and Information accessed, obtained, acquired or processed by Intern for and on behalf of TCS, its affiliates or Clients, Intern undertake that he/she will:

- a) Process the Personal Data and Information only on behalf of TCS, its Affiliates or Clients, as the case may be, and only on and in accordance with instructions received from the data controller from time to time;
- b) Abide by such technical and organizational measures necessary to prevent the accidental or unlawful destruction or accidental loss, alteration, un-authorized disclosure or access to the Personal Data and Information;
- c) Promptly (and in any event within 24 hours of awareness) bring to notice of TCS or its Affiliates, as the case may be, of any actual or suspected incident of unauthorized or accidental disclosure of, or access to, the Personal Data and Information or other breach of this section (a “Security Breach”);
- d) Promptly provide TCS with all information in Intern’s notice, possession or control concerning any Security Breach and not make any public announcement regarding a Security Breach without TCS’ prior written consent;
- e) Not do, or omit to do, anything, which would cause TCS or any of its employees, officers or agents to be in breach of its obligations under any privacy or data protection policy, regulation or legislation;
- f) Upon expiry or termination of Intern’s engagement with TCS, return all copies of the Personal Data and Information to TCS in Intern’s possession or control; and
- g) Promptly bring to TCS’ notice of any request received from a data subject to have access to his/her Personal Data and Information or of any other communication relating to the access, use or processing of any Personal Data and Information (including any notice from the regulatory body) and fully co-operate and assist TCS in relation to any such request or communication.

6.3 Intern expressly consent that TCS and/or its affiliates may collect, use, transfer, retain or otherwise process Intern’s Personal Data and Information in connection with his/her engagement with TCS, in accordance with the then / current TCS policies and procedures and applicable privacy and data protection legislation. TCS may use Third-Party services or sub-contractors to collect or otherwise process Intern’s Personal Data and Information for which TCS shall remain responsible for

such Third-Party services provider or sub-contractor's compliance with TCS' obligations hereunder.

7. Working in SBWS™ Framework

Intern may be required to work in TCS or its Client's premises or from home (remote working) as per the directions of supervisor and / or the provisions of the applicable policy. Intern understands that working in this hybrid environment may have higher confidentiality and information security risks. Intern acknowledges that when working remotely the Intern:

- a) will work only in a private, secured work area in compliance with the guidelines issued and amended from time to time.
- b) will comply with and work in a manner consistent with TCS Data Privacy and Security Policies/Protocols.
- c) will bring to the notice of HR of the Unit to any circumstances that prevent Intern from working in a manner consistent with TCS data privacy and security policies/protocols.
- d) will inform the HR of the Unit if the Intern shares a home with any family member or an individual who is employed by a competitor of TCS or TCS client the Associate is assigned to, or if any other circumstances at home exist which implicates the TCS Code of Conduct Conflict of Interest provision;
- e) will ensure utmost care and adhere to Confidentiality, IP Protection / Non-Disclosure obligations.
- f) will be using the Company allotted laptop or similar authorized computing device (together called "official asset") only to connect to TCS network/customer network through authorized means (or the Customer provided laptop to access the customer network if so, mandated by the Customer).
- g) will not allow anybody to share the official asset being used
- h) where allowed to use personal workstation/laptop or similar computing device (together called "personal asset") to connect to TCS network/customer network, Intern will ensure that he/she fully complies with obligations under this Confidentiality, IP Protection / Non-Disclosure Agreement and adheres to the security best practices that is generally followed and ensure that Intern's access to TCS / TCS Client systems is in line with the approved model. The Intern further agrees that by seeking permission to use a personal asset, the Intern implicitly authorizes the Company to have unhindered access to run scans / forensics, should there be justified reasons to do so.

8. Restriction on Intern's Rights

Intern agrees that he or she shall not make, have made, replicate, reproduce, use, sell, incorporate or otherwise exploit, for his or her own use or for any other purpose, any of the Confidential Information including intellectual properties of TCS that is or may be revealed to him or her by TCS or which may in the course of his or her employment with TCS come into his or her possession or knowledge unless specifically authorized to do so in writing by TCS.

9. No License

TCS and Intern agree that no license under any patent or copyright now existing or hereafter obtained by TCS is granted, agreed to be granted, or implied by the terms of this Agreement, or by the disclosure to Intern of the Confidential Information.

10. Equitable Rights

Intern acknowledges that any Confidential Information that comes into the possession and / or knowledge of Intern is of a unique, highly confidential and proprietary nature. It is further acknowledged by Intern that the disclosure, distribution, dissemination and / or release by Intern of the Confidential Information without the prior written consent of TCS or any breach of the Confidentiality Clause by Intern will cause TCS to suffer severe, immediate and irreparable damage and that upon any such breach or any threat thereof, TCS shall without prejudice to any other remedies available to it, be entitled to appropriate equitable relief including the relief of specific performance and injunctive relief, in addition to whatever remedies it might have at law.

11. General

- a) The provisions hereof shall be interpreted, determined and enforced in accordance with the laws of India.
- b) In the event of any dispute or disagreement over the interpretation of any of the terms herein contained or may claim or liability of any party, the same shall be referred to a person to be nominated by TCS, whose decision shall be final and binding upon the parties hereto. Subject to the above, the arbitration shall be governed by the Arbitration and Conciliation Act, 1996 or any modifications or re-enactment thereof. Intern confirms that the fact that the arbitrator shall be a nominee of TCS shall not be a ground for objecting to such arbitration or challenging the decision of the arbitrator. The venue of arbitration shall be Mumbai. Subject to the

above arbitration clause, the Parties agreed to the binding jurisdiction of the Courts at Mumbai under the laws of India.

- c) If any provision hereof shall be found by a judicial tribunal to be contrary to governing law, it shall be deemed null and void without annulling or rendering invalid the remainder of the Agreement and if the invalid portion is such that the remainder cannot be sustained without it, the Parties herein shall find a suitable replacement to the invalid portion that shall be legally valid.
- d) This Confidentiality clause along with other documents executed by Intern or referenced in any such documents constitutes the entire understanding between the parties and supersedes all prior agreements and understandings pertaining to the subject matter thereof. No delay of omission of either Party in exercising or enforcing any of their rights or remedies hereunder shall constitute a waiver thereof.
- e) This Confidentiality clause may not be amended except in writing signed by authorized representatives of both parties.
- f) The obligations of Intern in terms of this Confidentiality clause shall continue during the term of or in the course of the internship of the Intern with TCS and shall continue thereafter in perpetuity.

Abstract

PLCs are computer devices often used in industrial control systems as primary components that provide operational control and monitoring. The software running on these controllers is usually programmed in an IDE using a graphical or textual language defined in the IEC 61131-3 standard.

Although traditionally, engineers have tested PLCs' software manually, test automation is being adopted during development in various compliant development environments. Via this project, we are trying to tackle the problem of choosing a test automation framework for testing PLCs, by focusing on the CODESYS development environment.

Test automation can be defined as the process of automating software testing tasks such as test script development, test execution, and requirements verification using an automation test framework. The importance of choosing the right test automation tool has received significant attention from both academia and industry in recent years. There are various frameworks and tools that are being used to automate testing in the industry today[8].

The objective of the project is to automatically test ifm IoTCore library and edge controller library and their function blocks (which are used to gather data from sensors) using two software's. To develop this, it is necessary to understand different IoT communication protocols, ifm IoT core libraries, and different software that are being developed for automated testing.

We will be gathering data from IoT sensors which are connected to IoT gateways and this data will be displayed on the HMI. IoT sensors perform functions like data conversion, digital processing, and communication with external devices and the Cloud. IoT gateway that we are using requires IoT sensors for sending data to the cloud or to locally analyse information. The IoT devices are connected to AL Master which is the gateway for establishing the communication between IoT devices and edge controller which has an HMI screen. To get the data of these IoT devices a connection must be established between the controller and IoT devices.

Through extensive research and study of various frameworks and software's we have selected two automation software's that were not only compatible with CODESYS but that have also gained popularity in industries for automated testing of PLC's. we have chosen two automation software i.e., CODESYS Test Manager which requires licence and is a paid software and CODESYS Co-unit which is a freeware. using these two software's we will be testing ifm IoT library function blocks, these function blocks will be used to collect and analyse the data from the sensor and in the end a comparison between the two software's will be drawn out to determine which software will work the best for PLC software.

Abstract

The proposed novel system consists of a loadcell and supporting electronic hardware. The loadcell is attached to a Plastic pipe and other end of pipe is closed. It acts as a float. The loadcell is installed on top of the tank. So the float will be oriented in to the bottom of the tank. As the liquid is filled in the tank, the force will be exerted on stem and intern on the loadcell. The force on loadcell is converted in to electrical signal. The Same signal is then processed to provide the output as 4-20mA. Load cell is interfaced to the main controller through HX711 module. Arduino is used for software-based signal conditioning. As we know the output of transmitter is 4 to 20 mA and loadcell gives the output in voltage. So, a V to I converter is connected at the output. The system is capable of connecting display and keyboard for on-site calibration. The calibration constant is stored in the internal memory. The same is used for providing output.

ABSTRACT

The term 'Shirodhara' comes from two Sanskrit words, where 'Shiro' means 'head' and 'Dhara' implies to 'flow', together it infers to pouring of warm herbal ayurvedic fluids on the forehead from a specific height, for a specific time period in a continuous stream, allowing the oil to run through the scalp and down into the hair.

The present process requires manual operation in which the operator has to maintain the temperature of the fluid, collect the fluid, refill the vessel and perform oscillations of the vessel. This entire process is tedious and time consuming, hence the aim of the project is to automate the entire process of Shirodhara operation in an efficient and cost-effective manner.

The initial phase of the project consisted of designing and testing of the temperature control loop (continuously stirred system) and the fluid recycling control loop and the second phase involved the designing and building of the Printed circuit board (PCB) and fabrication of the complete Shirodhara apparatus.

Abstract

Kashaya is widely used form of dosage in Ayurveda. Kashaya refers to a water extract of a single Herb or group of Herbs. We have taken this problem statement from the SIH (Smart India Hackathon). Kashaya making process requires strictly continuous monitoring and controlling. As this process takes a lot of time, user stuck in the process.

So, to overcome this problem we are making automatic portable Kashaya making system. There is no such product available in the market which follows the traditional method of making Kashaya. We have used HX711 Load Cell Signal Conditioning Module and MAX6675 cold junction compensated K thermocouple-to-digital converter, it is interfaced with the Arduino.

Our product is taking inputs from the user like weight of the Kashaya *Churna*, the amount of water user wants to add and also user can decide amount of Kashaya he want after heating process. After taking the inputs from the user, system will start heating process. During this process system will continuously monitor temperature up to a default given setpoint. Also, system will continuously measure the weight of the mixture. After heating when desirable amount of mixture is produced, our system will stop the heating process.

Abstract

PID controllers are found in a wide range of applications for industrial process control. Approximately 95% of the closed-loop operations of the industrial automation sector use PID controllers. PID tuning is the procedure of finding the values of proportional, integral, and derivative gains to achieve desired performance and meet design requirements. These three controllers are combined in such a way that it produces a control signal to regulate various process parameters like temperature, pressure, flow and level in a closed loop. As a feedback controller, it delivers the control output at desired levels. Before microprocessors were invented, PID control was implemented by the pneumatic analog electronic components. But today all PID controllers are processed by the microprocessors. Programmable logic controllers also have the inbuilt PID controller instructions.

PID controllers are generally tuned using various methods in the industries, but most of these methods are ineffective as they do not consider the system variables. The aim of the project is to auto tune a PID controller for DC motor speed control using data analysis. This can be achieved by collection of data from hardware assembly and applying data analysis algorithms such as linear regression on this collected data.

This project focuses on reducing setup time of the real time system by providing accurate tuning parameters from the developed algorithm.

Abstract

The increase in technological advancements in recent years has led to the emergence of a new lifestyle. Although being assisted by machines for small-scale tasks in daily housework makes daily life easier, this has caused people to reduce their daily active movements and negatively affects human health.

Especially during the COVID-19 pandemic, with the conversion of the working style to the home environment, working hours spent at the desk are more than ever. Due to the prolongation of the working time, the employees stay in the same position more inactive, thus their muscles weaken and they start to have muscle disease. Weaknesses in the muscles have occurred to the formation of postural problems in people.

Technology advancements in wireless communication and embedded computing are fostering their evolution from standalone elements to smart objects seamlessly integrated in the broader context of the Internet of Things. In this context, wearable sensors represent the building block for new cyber-physical social systems, which aim at improving the well-being of people by monitoring and measuring their activities and providing immediate feedback to the users.

In our project we will be designing posture monitoring apparatus for physiotherapy. The efficacy of home-based physiotherapy depends on the correct and systematic execution of prescribed exercises. Biofeedback's systems enable it to accurately track exercise execution and prevent patients from unconsciously introducing incorrect postures or improper muscular loads on the prescribed exercises. This is often achieved using an inertial sensor as it can be used to monitor human motion variables and muscular activation.

The main aim of the system is to detect the correct or incorrect posture by detecting the changes occurring in human posture using sensors i.e. accelerometer sensor. The changes occurring in different directions left, right, forward and backward are detected using the sensor, by which angles are calculated depending on the direction of tiltation of the body.

Depending on the threshold set by the physiotherapist the patient will continue the movement, and once the angle of movement is equal to threshold the beep will be given by the buzzer. The proposed methodology will be applied to a controlled laboratory trial, for a set of different exercises often prescribed by physiotherapists.

ABSTRACT

The objective of the project is to develop a Detail Engineering Design Document (DEDD). To develop this DEDD it is necessary to understand different instrumentation engineering standards like ISA, ISO, API, ASME, IEC etc. To execute the above objective, we took the project from client, Worley, Pune as a case study. During this project, we learned functioning, roles & responsibilities of different engineering departments, project contracts, project stages and the entire project cycle along with the approval process of various deliverables and documents. This report includes Instrumentation Engineering Deliverables prepared on the basis of various inputs. P&ID is the first input document to all the disciplines to start the engineering in all phases of project. The deliverables include: Instrumentation Index, IO List, Instrument Data Sheets, Material Requisition, Instrument Installation Details (Hook Ups), Instrument Cable Schedule, Loop Drawings, etc.

ABSTRACT

ACKNOWLEDGEMENT

The Conventional method for the preparation of Ayurvedic medicine is the Manual method. Monitoring of the quantity of the ingredients, constant low temperature, Rate of production, Cost and reliability are some of the drawbacks of the manual method. Therefore to overcome these drawbacks an Automatic Ayurvedic Medicine Maker can be employed. It will overcome the above mentioned drawbacks with the implementation of mechanisms like automatic weight measurement, automatic temperature measurement and control, and an automatic stirrer. The system developed is user friendly and cost effective.

Abstract

We are creating and testing a cell culture incubator that will maintain a specific internal environment while being compatible with an inverted microscope. The internal environment must be 37°C, 95%+ humidity, 5ul/min flow and contain 5% CO2 in the box. There are current designs on the market that meet this criteria, but the inverted microscope is encapsulated into the incubator making it bulky and inconvenient to disassemble. We are going to design a cell incubator that will be portable and small enough to fit on the inverted microscope stage, allowing the user to view live cells inside of the incubator. The incubator will include a heated water pump and CO2 pump in order to reach the required environment for the cell. Transparency, heating, and insulation testing will be conducted on various materials to find the optimal combination for the incubator.

ABSTRACT

Technology only advances as years go by. One of the most outstanding devices that have been benefiting mankind for years now is "sensors".

The design of the Smart Shoe project is focused on the development of prototype footwear that can track and analyze various aspects of an individual's gait pattern.

The Smart Shoe is equipped with advanced sensors and technologies, including pressure sensors, accelerometers, heart rate sensors, and GPS.

The Smart Shoe can provide real-time feedback on an individual's gait pattern, allowing for immediate adjustments and improvements. Additionally, the Smart Shoe is wearable and non-invasive, making it a convenient option for gait analysis.

The purpose of this project is to design and develop a Smart Shoe prototype that offers features such as activity tracking, GPS navigation, and health monitoring.

As per the research, there are a total of 18 pressure points from which there are 3 points where the pressure is maximum, where pressure sensors are to be placed. The three positions are: (1) at the toe (2) in the middle of the feet (3) at the heel. The device also uses an accelerometer which will help record trips/falls while carrying out any activity. LED-based pulse sensors will give data about the heartbeat.

GPS sensor is used to record the location and this location can be sent to our close ones for security purposes and also give us the speed, time, and distance covered. The smart shoe is connected to the phone via a Bluetooth module.

The Smart Shoe is a device that will help individuals track their physical activities, monitor their health, and provide location-based services.

IoT Enabled Assistive Tool for Safety in Mountaineering

Abstract

Mountaineering and trekking are outdoor activities that attract thousands of enthusiasts each year. These activities often take place in remote and isolated areas, where medical assistance is scarce, and rescue operations are challenging. When trekkers are injured in such areas, they face significant challenges in accessing help due to the harsh terrain, limited resources and most notably due to lack of communication infrastructure. There is a need for an efficient, flexible, and economical solution for safety in mountaineering and other long-distance remote use cases where cellular networks prove ineffective. One of the promising technologies suitable for this application is the LoRa (long range) Network, which is used for communication in isolated areas such as wooded areas (forests) with more minor power consumption. Fast and low-effort localization can potentially increase the chances of saving injured individuals' lives. The proposed system aims to develop an IoT based system to ensure safety in mountaineers

Abstract

Traffic congestion is the biggest problem faced by densely populated countries like India, China etc. So, our project focuses on three areas- Ambulance, Priority vehicles like VIP cars, police jeeps and Traffic density Control.

In the world of Innovative and automotive world everything is getting computerized. Each data is in effect effortlessly available. Yet, the movement signals checking is as yet done physically. The activity signals are observed physically from the control room by the executives or a predictable time is settled for signals evolving. Rather than this a computerized controller-based activity checking framework will be useful for controlling the movement. This plan of movement foundation will be useful in decreasing the activity clog issue in urban communities. This paper depicts a framework where IR sensors are incorporated with an Arduino to work the paths which measure the movement thickness. This incorporated arrangement of movement is Internet of Things (IoT) based which likewise empowers to clear the activity for emergency vehicle by giving a catch in rescue vehicle so the activity gets cleared on that side. It additionally empowers the vehicles tally that move over the sensor.

This project is a replica of a four way lane crossing of real time scenario. In the first part, concentrated on problems faced by Ambulances, RFID concept is used to make the Ambulance's lane Green and thus providing a stoppage free way for the Ambulance. In the second part, concentrated on problems faced by Priority vehicles, IR transmitter and receiver are used to make the vehicles' lane Green and thus preventing traffic congestion. In the third part, concentrated on Traffic density control, IR transmitter and receiver are used to provide dynamic traffic control and thus increasing the duration of the Green light of the lane in which traffic density is high and hence, regulating traffic

ABSTRACT

Mood disorder is often overlooked and there are people who think that mood disorder is "all in your head". As per the record of World Health Organization (WHO), 5% of the adults are suffering from it.

If one has Mood disorder, the general emotional state or mood is distorted or inconsistent with your circumstances and interferes with one's ability to function. Mental illness is still a taboo. People hesitate to consult a health specialist, hence a system is required as an early detection.

The primary objective is to improve this situation by designing a user-friendly mobile application. In the proposed application, the condition of the people will be analysed with the help of standard Mood Disorder Questionnaire (MDQ), Emotion analysis using face detection with the help of image processing in Python, EEG signals and PPG signals.

The results received from above mentioned analysis will determine the severity level of mood disorder using machine learning algorithm. Depending on the severity several activities will be given.

These activities will include some yoga, games, meditation and exercise. Users are suggested to take the above four tests every week to check the progress. In case of high severity, according to the user's location, a suggested list of health specialists will be recommended.

Abstract

Project Title: SOIL NUTRIENTS ANALYSIS.

The project aimed to develop a method for estimating the NPK (Nitrogen, Phosphorus, and Potassium) percentages in soil using the TCS34725 color sensor and an RGB LED. The TCS34725 color sensor was utilized to measure the NPK values of the soil sample.

The experiment involved illuminating a soil sample with the RGB LED and capturing the reflected light using the TCS34725 color sensor. The RGB values obtained from the sensor were used to calculate the NPK percentages based on a proportional relationship. The calibration factors were applied to adjust the values and account for any variations.

The developed system provided real-time feedback by displaying the NPK percentages on the RGB LED. The NPK percentages were derived by converting the RGB values into respective nutrient percentages using the calibration factors. The RGB LED represented the NPK percentages, with the red LED indicating nitrogen, the green LED indicating phosphorus, and the blue LED indicating potassium.

The experimental results showed a strong correlation between the RGB values and the NPK percentages determined through laboratory soil testing. The system provided a quick and convenient method for estimating the NPK percentages in soil, eliminating the need for time-consuming and expensive laboratory analysis.

The proposed method offers advantages such as cost-effectiveness, portability, and real-time monitoring of soil nutrient levels. However, it should be noted that the accuracy and reliability of the NPK percentage estimation may vary depending on the calibration factors used and the soil composition.

In conclusion, the developed method using the TCS34725 color sensor and RGB LED provides a promising approach for estimating NPK percentages in soil. It offers potential applications in agriculture, allowing farmers and researchers to quickly assess soil fertility and make informed decisions regarding nutrient management strategies.

Keywords: Soil nutrients analysis, NPK percentage, TCS34725 color sensor, RGB LED, Calibration factors, Real-time monitoring.

TO WHOMSOEVER IT MAY CONCERN

This is to certify that Ms. Sakshi Sachin Kulkarni a 2nd year Engineering student from Instrumentation Department of MKSSS Cummins College of Engineering for Women has completed summer internship at our company for the period 15 June 2023 to 30 Jul 2023.

Sakshi learnt Arduino programming and applied her knowledge and built firmware as a part of our new product development. She is enthusiastic, quick learner, and methodical in her approach. We would like her to keep the association with us for her upcoming internships.

With Best wishes,

Sincerely,

Rajendra Sapre,

Director,
Edgelytics Solutions Pvt. Ltd.

Date: 24-Aug-2023

Appointment Letter

Date: 22nd September, 2021

To,

Shreya Chourasiya

DEPARTMENT OF INFORMATION TECHNOLOGY,
MKSSS's Cummins College of Engineering for Women, Karve Nagar, Pune, Maharashtra 411052

Congratulations! We are pleased to offer you **2 months of part time Internship** starting **1st June** as a "Summer Intern" with **WIDS Pune**. We welcome you to WIDS Pune and wish you a great learning experience.

Your responsibilities will include ramp up on methods, tools and techniques required to do the job which will be informed to you from time to time. You will be provided periodic and on the job training and induction based on the need by WIDS Pune.

The nature of work will be remote and the team will be virtual, spread across all over India. You will be required to report regularly via telephonic and video conference methods of communication in addition to email and WhatsApp/Telegram communication.

This will be an unpaid internship. Appointment letters & Experience letters will be given only on successful, consistent performance till the end of the Internship period, regularity and sincerity in the approach, the quality & completeness of work and timeliness of deliverables.

Lot of confidential data will be shared to you as a part of internship and you should not disclose it to anyone including friends, family, classmates, teachers, or share it in any medium such as social media, WhatsApp, email, cloud. Violating the Terms and Conditions of the appointment letter and confidentiality agreement can lead to termination of internship without prior notice and can have serious legal implications and issues with our partners and collaborators.

Please countersign the copy of this appointment letter as an acceptance of the Terms and Conditions of this Internship.

Thanking you

Ms Sucheta Dhere,

WIDS Pune 2021 Ambassador

WOMEN IN DATA SCIENCE PUNE

Date: 22nd September, 2021

Experience Letter

This is to certify that **Sayali Oak** has successfully served **Summer Internship** with **WIDS Pune** from **1st June 2021** to **31st July 2021** on part time basis.

We thank **Sayali Oak** for her contributions to WIDS Pune and wish her a great career and success in her future endeavours.

We would like her to respect and honour the NDA and maintain the confidentiality of data and information she had access to, as the part of the project or while working with us and do not use or share any data, analysis or results, with anyone as it's the property of WIDS Pune.

As learning is an on-going process, we encourage and recommend that she work on following the company processes and guidelines which are laid out at the beginning of the Internship, and are informed as a part of induction for your next internships, be proactive, alert, show interest and understand that sense of time and urgency. Students should increase self-study, research through internet, extensive browsing on the given topic, communication skills – not make assumptions, clarify, plan ahead, think before doing anything, reason & apply proper logic to the task and clearly understand on what they are doing and why they are doing a particular task or activity.

Katalyst
words of change

Mphasis Katalyst
Katalyst is an initiative
that empowers young
women from low income communities
to gain higher education for leadership
roles. The aim is to bridge the gender divide
by helping them to find success in challenging
educational and career environments through an integral
mentoring, personal and professional development
program. The girls are expected to not only excel in
the corporate world through internships, but also lead
other girls to success.
